

Physical Connection Test.

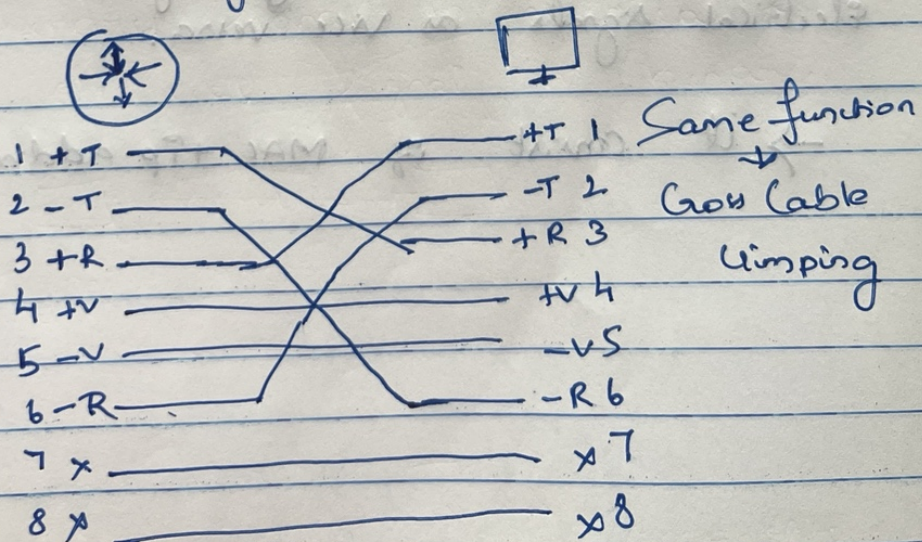

① Types of medium:

- i) Radio Frequency (wireless)
- ii) Electrical signal (wired - copper)
- iii) Light signal (OFC) Fibre.

② Write down SWITCH 8-pins?

1 +R } Receiving
2 -R }
3 +T }
4 +V } Sending
5 -V }
6 -T }
7 x
8 x

③ Connecting UTP Cable between two device

④ Explain Auto-MDIX?

It is a feature that is present in NIC (Network Interface Card), that accepts the cable regardless of cross or straight cable according to the data flow pin change occurs automatically.

⑤ Types of NIC & its functions.
Network Interface Card.

Two types of NIC

i) Wired

Optic
Fibre

ii) Wireless

Functions:

→ it converts Binary signals to electrical signals as vice versa.

→ it consists of MAC + IP address.
